**Thursday, April 25, 2024**

***NO Shipping Available***

Please call us if we can help direct you to our  
Ag Heritage Building on Franklin Farm Lane:  
717-264-5499.

**\* ALL SALES FINAL \***

## 2024 Tree Seedling Sale - Apples, Peaches, Cherries

Fruit trees are available on a first-come first-served basis. We have a fairly limited supply of these, so please **CALL BEFORE** using this order form: **717-264-5499**.

Trees are 2-year-old budded specimens.

### TRIUMPH® APPLE

An offspring of the 'Honeycrisp' apple, Triumph® produces attractive fruit. It has demonstrated excellent scab tolerance, good fresh eating qualities and long storage life. Ready to harvest in late September, Triumph® is a pleasantly tart and well-balanced red apple with good storage life.

### CONTENDER PEACH

Known for being cold-hardy and having excellent disease resistance. Medium-sized peaches taste very sweet with an acidic balance. Freestone. Self-pollinating. Needs 6-8 hrs of full sunlight per day. Mature tree height 10-15 ft. Requires well-drained soil. Fruit ripens mid-to-late August.

### GOLDRUSH APPLE

Best known for its remarkable keeping qualities. Will keep in regular cold storage approximately 10 or 11 months. Fruit has a tart, tangy flavor that sweetens with age. GoldRush resists oxidation when cut, making a nice, yellow sauce, and the fruit also bakes very well. Resistant to scab and mildew. Late maturing variety. Well suited for both raw and cooked consumption.

### REDHAVEN PEACH

Considered by many as the standard for the Northeast peach industry. Tree is vigorous, very bud-hardy and productive. Heavy-bearing. Easy to grow and maintain. Drought tolerant. Fruit is medium to large and colors to a brilliant red. Freestone. Self-pollinating. Ripens around August 1.

**MILORGANITE POUCHES - Hang them on your fruit and hardwood trees!** Milorganite, an organic nitrogen fertilizer, is a useful product for preventing deer from grazing on fruit trees and ornamental plantings. Hang a small pouch (2x3") on each tree or spread around plantings to deter deer. Generally, it will retain its scent for a full growing season if hung from the tree because the product will not come in contact with the ground. (Milorganite *is* safe for children and pets.)

### MONTMORENCY CHERRY

Widely cultivated for its juicy, sour cherries. Makes up 80% of pie cherry trees grown in America. Incredibly reliable high production of firm, bright red, sweet and tangy cherries with yellow flesh and clear juice perfect for baking or dehydrating. Cold hardy and spreading to around 15'. Best planted in full sun in loamy well drained soil. Disease resistant and easier to grow than sweet cherries.

# 2024 Tree Seedling Sale - *Hardwoods, Conifers/Evergreens*

## AMERICAN ARBORVITAE

Grows at a slow to medium rate to a height of 40-60 ft with a spread of 10-15 ft at maturity. Full sun is ideal. Grows well in nearly any soil. Leaves change from bright green in summer to rich yellow-brown-green hues in winter. Adapts well to shearing and shaping. Yields light brown oblong cones.

## AMERICAN ELDERBERRY

A woody shrub or small tree. Reaches 5-12 ft tall, 6-10 ft wide. Tolerates a wide variety of wet to dry soils. Prolific spreading. Best used in naturalized areas as a hedge, in a woodland, or along streams and ponds. Good addition to butterfly and pollinator-friendly areas. Berries, inedible when raw, are used for making jelly, wine and pies.

## BLACK WALNUT

Best as an open grown tree. Grows 15-25 ft wide and 20-30 ft high. Tree will develop with an oval, moderately spreading crown. Adaptable but prefers moist, well-drained soils. Withstands heavy pruning and prefers full sun to partial shade. Showy white flowers in the spring. Fruit can be used for jams/wines.

## COLORADO BLUE SPRUCE

A handsome ornamental specimen in a single planting or as a dense, colorful screen or windbreak. Reaches height of 50-75'. Its stiff silvery-blue to bluish-green needles are about 1" long. Prefers ordinary soil, average moisture, and full sun. Does not like wet soil. Deer-resistant with a strong, fresh, piney smell.

## CONCOLOR FIR

Soft needles vary from silvery-blue to silvery-green. Grows best in well-drained soil and full sun. Will not do well in heavy, clay soil. This narrow, pyramidal fir is one of the best for northern gardens, noted for withstanding heat and drought better than most firs. A good timber tree as well as an excellent choice for a Christmas tree.

## EASTERN WHITE PINE

Fast growing to 100 ft. A five-needled pine, with soft, light green-blue needles, 4 inches long. Grows in normal moisture conditions but can tolerate wet, swampy areas as well as dry, rocky soil. Excellent ornamental tree for specimens, naturalizing, windbreak or dense screen. Also widely used for Christmas trees and timber.

## NORWAY SPRUCE

Fastest growing of the spruces reaching a height of 40-60 ft with a spread of 25-30 ft. Develops strong graceful branches that are covered with dark green needles. Makes an ideal windbreaker. Grows at a medium to fast growth rate and does well in full sun. Also makes a wonderful wildlife habitat. Yields light brown 4-6 inch cones.

## PERSIMMON

Grows up to 60 ft. Fragrant white flowers in the spring yield orange edible fruit in the fall. Sometimes used as an ornamental for its hardiness, adaptability to a wide range of soils and climates, and immunity from disease and insects. Moist, well-drained soils provide best conditions but will tolerate hot, dry, poor soils. Thick, dark green leaves turn a yellow fall color.

## RED OAK

A common dominant forest tree growing to 100 ft or more in moist to dry soils. Deer, bear, and many other mammals and birds eat the acorns. Often planted as a shade tree. The "red oak group" includes all oaks with bristle-tipped leaves and acorns ripening over two seasons.

## SCARLET MAPLE

Fast-growing trees 60-90 feet in height. The largest ones can grow more than 120 feet tall. Tolerant to a variety of soil conditions. A colorful addition to any garden. The red leaves this tree produces are bright and brilliant as the fall sun shines on them.
